

API-2000 Instructions

Apply equal force to both sides.

Removing the cover when unit is not mounted:

Hold unit at top back corners. Insert key, flat head screwdriver, letter opener, etc., Between the cover and the back at the top center. Lift up key to separate cover from back plate.

Apply equal force to both sides.

Removing the cover when unit is on wall:

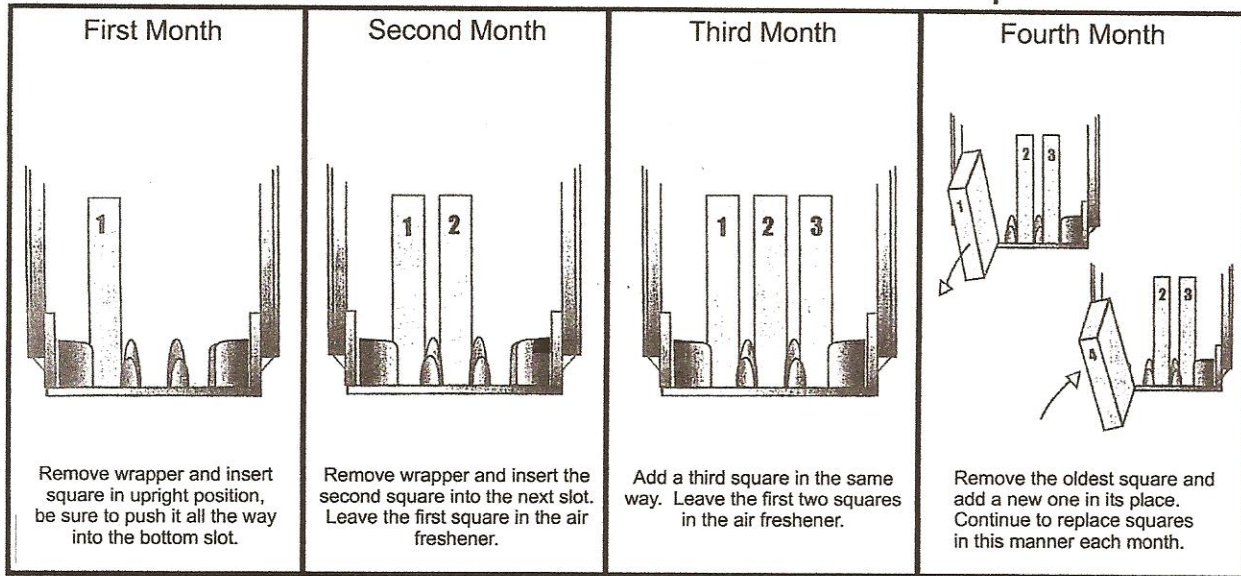

Hold the unit on both sides as close to the bottom as possible. Squeeze the cover on both sides until you are able to pull the cover down and off.

Please note that air freshener units must be mounted on the wall prior to adding liquid refill, and must remain mounted at all times while the liquid is in use.

Smells Good

Instructions for Smells Good Deodorant Squares:

Note: DO NOT allow any of the squares to touch each other as they can bleed from one another.

Caution: Keep out of reach of children. Do not ingest or let liquid come into contact with skin or eyes. Avoid contact between squares and carpet, plastic, vinyl, or painted surfaces.

Instructions for liquid refills:

For both Electric and Battery API 2000 Units

Liquid refills:

Changes the wicks every time you refill your machine

Use two wicks, folding each in half to create a loop. Insert cut ends into bottom of liquid container. Make sure wicks touch bottom of container
